

Our **NEW** ThermoGuard<sup>TM</sup> polyurethane doors build on the Midland tradition of building doors that our dealers love to install and customers are proud to own. Our ThermoGuard doors feature a proprietary polyurethane insulation that is environmentally friendly and provides an exceptional R-value for maximum insulating power.

Our value doesn't stop there. ThermoGuard doors are built to last using custom, heavy-duty galvanized hardware and commercial-grade Alcryn<sup>®</sup> bulb joint seal for both residential and commercial applications. For added beauty and durability, we conceal full-height center stiles and tailor-make custom end stiles. We build our ThermoGuard series using a patented new process that offers improved manufacturing precision and efficiency compared to other doors on the market.

# WARM AND INVITING, INSIDE AND OUT

Our **NEW** ThermoGuard doors are available in 2- and 3-inch thicknesses for commercial and 2-inch residential use. The new, custom-blend polyurethane couples with an abundance of thermal components to efficiently cut energy expenses while also acting as a sound barrier.

For an exceptional R-value, we incorporate commercial-grade seals to separate the internal and external skins and a durometer seal for a tight barrier between the door and jamb. The design keeps moisture out while standing up to extreme temperatures.

## INSULATION

	Commercial	Residential
Thickness	3 inches	2 inches
Maximum Width	40 feet 2 inches	32 feet 2 inches
Foam/Insulate	Polyurethane	Polyurethane
R-Value	26.0	18.0
Exterior Steel	27 gauge optional 20-gauge upgrade available in white only	27 gauge optional 20-gauge upgrade available in white only
Interior Steel	27 gauge	27 gauge
Warranty* Excludes Springs	10 years	10 years

\*For full warranty details, contact your Midland dealer.

### Extreme Durability

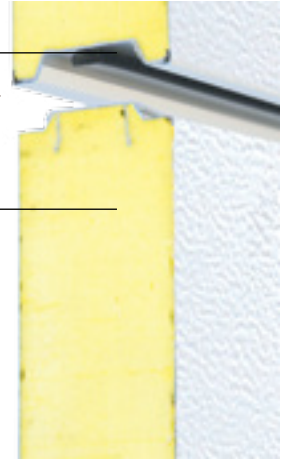

Alcryn bulb joint seal holds up in temperatures from -130° F to 225° F.

### Lower Energy Costs

Polyurethane insulation helps maintain building temperature.

### Moisture Resistant

Closed-cell end dam and bottom extrusion seals form a tight barrier.

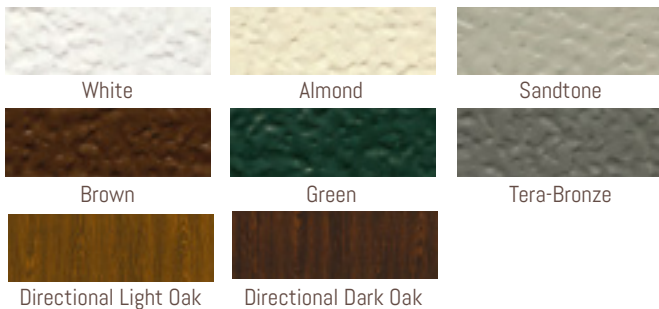

## COLOR AND STYLE

For style and character to complement any home, choose from our full range of premium options. For most colors, ThermoGuard doors feature 30-year Valspar® WeatherXL™ paint to provide decades of chalk and fade resistance. Valspar Diamond Guard® paint provides greater durability for our white doors. Woodgrain exteriors come standard with a protective clear coat finish.

### CHOOSE YOUR COLOR

Due to printing processes, colors may not be an accurate representation of the final product. Please contact your Midland dealer for authentic color swatches or further details.
